**Jhashua Canton Ruiz**

has successfully completed the online, non-credit Professional  
Certificate

# Akamai Network Engineering

In Network Engineering, you need an understanding of protocols, architectures, and technologies. This program provides a practical education that equips you with the skills and knowledge needed to thrive in this field. You will learn how to design, deploy, and manage scalable, secure and highly available network infrastructures, and configure and troubleshoot network devices. You will gain hands-on experience with Akamai's Intelligent Edge Platform, learning techniques like load balancing, caching, and more. In addition, you will demonstrate your ability to apply your knowledge and skills to real-world scenarios allowing you to gain the confidence and credentials to pursue careers in network engineering, infrastructure architecture, or security in a variety of industries.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
