Jhashua Canton

has successfully completed the online, non-credit Specialization

Microsoft Azure Cybersecurity Tools and Solutions

Congratulations on completing the Microsoft Azure Cybersecurity Tools and Solutions Specialization! You've acquired essential skills in Azure cloud security and management. This certificate demonstrates your expertise in Microsoft Azure cybersecurity and can be shared with your professional network. Through instructional content, assessments, and hands-on projects, you've gained proficiency in: · Authorization and authentication techniques · Azure Active Directory management · Cloud security policies and Microsoft Defender · Penetration testing and security scan interpretation · Data management and regulatory compliance · Leveraging Copilot for cybersecurity tasks
